Well, Akhee...our friends has kept it very discreet about what you two spoke about...why don't you tell me what your ideas about the PR you would like to see us doing?

7:07 PM ✓✓

Well... 7:08 PM

Firstly three main target demographics. Firstly, sisters. Secondly those who are waiting and are unsure about attacks (especially civilian) thirdly media correction or memes.

7:09 PM

I like the way you think Akhee. 7:09 PM ✓✓

Sisters, are very crucial to our goals in the Ummah. They don't even see our beloved sisters coming at the end of the day Akhee.

7:10 PM ✓✓

For sisters, I would recommend a series, YouTube if possible, just about Islamic reminders and living in the west (and why living in an Islamic society has unique advantages)

7:10 PM

Inshallah. 7:11 PM ✓✓

We need strong brothers who are indeed willing to conduct operations here and over there AND brothers that know what they are doing!

7:12 PM ✓✓

Yes, the best utilization would be to have a web series (again if possible on YouTube that would best) and it could be a series covering daily reminders, the differences in western and Islamic culture, how to have modesty and how to be a good wife. Further more, there should be influences on target practicing or encouraging brothers to accept the needs of the ummah, that being jihad. THIS part specifically should be outlined over time, and should focus on having empathy for the ummah and then hatred for the kuffar, but in a subtle way by exposing their ideological absurdities.

This isn't expert advice its common knowledge 7:16 PM

This is very true but a lot of good brothers don't listen to common knowledge and nor do they practice it! 7:17 PM ✓✓

You will have to teach them then. Which is fine 7:17 PM

Inshallah. 7:17 PM ✓✓

We have all the time in the world Akhee. The kuffar is the one that doesn't have the time. 7:18 PM ✓✓

Specifically within the US, the video should focus on the current socio-political climate, that being progressive society and social justice, versus traditional cultural norms

7:19 PM

We have brothers making all sort of videos but the problem is they are of the old mentality and are not use to making videos for the audience here in this kuffar land.

Firstly, let's assume you're affiliated with someone, whose logo you couldn't use on YouTube because it would immediately be flagged and taken down

7:36 PM

Ultimately you'll have to make a subdivision for some videos to allow the general public to view them

7:36 PM

However other videos for aforementioned group, would also need to be produced, those specific videos could remain as they are, but would require more detail.

7:37 PM

I agree.

7:38 PM ✓✓

For example, you might ask yourself, what kind of video is most important in this exact moment?

Now the creation of such a video and sending it KNOWING It'll be used for crime in anyway, of course is illegal and would have the ATF at your doors faster than the FBI.

8:14 PM

Now then.

On such a video three things are needed.

8:14 PM

One: the video must be said it's for scientific purposes only and not to be used in any crimes.

8:15 PM

Second: such a video must show proper yield to explosive equipment gained. Not just the amount of explosive you'll have after its creation but how much that specific amount has in demolition power. This should be done in yields the common man can understand, example, X amount will destroy a car, x amount will destroy a 1 story building, x amount 2 story if place properly, and X amount for a 3 story building.

Third: such a video needs to show two things, how to obtain the catalyst needed, one being sulfuric acid (easily obtained via car batteries.) the other being hydrochloric acid. Easily purchased in a variety of ways within the US and SOME European counties. My recommendation is the utilization of a school, claim to be a science teacher there and pay for said equipment with an old burner Visa card

8:19 PM

8:25 PM ✓✓

The video in question should be a self analysis video on potential war crimes, the standards of warfare practices historically and in a contemporary setting. And compare the two. From there a contrast is needed, let's say the US for example. And should focus on again historical vs contemporary. I'd use the crusades for example, the first 3 to be specific. And compare the rise and fall of the Roman empire to the current rise and fall of the US. (Focus on military expeditions, violence and overall ideology of both cultures)

On top of the charges for having explosive materials on top of attempting to provide some form of support

9:03 PM

Now steve at this point is facing, probably 45 to 50 years in prison, maybe 35 if he takes a plea deal.

9:04 PM

So let me end this story with this statement

9:04 PM

I'm not steve. I'm not dumb enough to follow in the hopefully footsteps of steve.

9:05 PM

Now I'm gonna tell ya this one last time so we're clear, your the one in need here not myself. Life continues as it does.

Dont ask me any questions that you dont need to. Nor question why in instruct you a certain way. With utmost respect ahki, these questions your asking are not only tedious and a waste of time but frankly annoying. I have no ego to be played nor a need for money or fame.

9:06 PM

So when I tell you to make whatever, and I clarify what it's for who it's for and what the focal points are. That's it.

Dont ask for anything else. 9:07 PM

Nor question anything I asked. 9:07 PM

EVER. 9:07 PM

Because I'm not going to end up like steve
9:07 PM

Now you get to work on what I said, as I
said and you finish it. 9:08 PM

You do that, then we can talk more. Other
than that, theres nothing more to say here
9:08 PM

I dont like you questions 9:08 PM

And I dont like how you're questioning the
nature of what I asked 9:08 PM

A man blowing up a tree trunk is the same
as a man blowing up a building, the
materials used are the same 9:08 PM

And the process to acquire those
materials are also the same. 9:09 PM

Now wither or not that building has people
in it, or that tree has termites in it, doesn't
matter. In both scenarios the building and
the tree stump are destroyed 9:09 PM

9:09 PM

Now you go make my video. 9:10 PM

Or I'll out you right here and now as a federal agent 9:10 PM

And I dont give a single fuck what you have to say 9:10 PM

You have your orders, Do it. And i dont care who gave you tazkiyah 9:10 PM

Or if baghdadi himself vouches for you 9:10 PM

My friend abu isa Died, because he didnt listen to me when I told him not to trust someone 9:11 PM

And here we are. 9:11 PM

Hes a shaheed because he didnt listen. 9:11 PM

Now make my goddamn video and dont ask me another goddamn thing. 9:11 PM

Contact me when your done. 9:11 PM

And if your dumb enough to try to come after me, on the off chance you in fact are a federal agent, we'll go to trial and I'll

a federal agent, we'll go to trial and I'll win. And your name will be on the docket

9:12 PM

So dont you say another fucking thing to me

9:12 PM

Until you've made what I asked for.

9:12 PM

I don't wanna hear anything your about to type. Go fucking do what I told you

9:13 PM

What did I just tell you?

9:14 PM

Whatever your about to fucking say it doesn't matter to me. Either you make the video and you prove you arent a fed, or you say whatever you're gonna say, and dont make the video and prove you are a fed.

9:15 PM

Okay, now that you are done, let me tell something....you think you know a lot and yet you have done nothing for the cause and sit you on your computer all day long and come up crazy stories like the one above.

There is no need for you to flip out and talk for as long as you have. I have not asked you any specific questions on anything

There is no need for you to flip out and talk for as long as you have. I have not asked you any specific questions on anything besides what i was told you wanted to talk about.

And I agree we are done for now.

9:21 PM ✓✓

What research have you done so far for the fireworks?

How's that helping the Ummah and the cause.

9:27 PM

You dont need to know if I can make explosives or not

9:27 PM

Nor should you ask how a video on demolition is useful to the ummah. It has obvious implications unless your an idiot.

9:27 PM

You said explosive video correct?

There is a lot to instruct on...what specific ideas do you have Akhee for the first video?

video?

This correct:

Second: such a video must show proper yield to explosive equipment gained. Not just the amount of explosive you'll have after its creation but how much that specific amount has in demolition power. This should be done in yields the common man can understand, example, X amount will destroy a car, x amount will destroy a 1 story building, x amount 2 story if place properly, and X amount for a 3 story building.

9:28 PM

Nothing that needed to be said or clarified you can read as well as anyone else, it does nothing but provide evidence of an intent

I'm at work ahki. Please be brief for now. I get off in two hours though

2:09 PM

Saw your message...been busy, starting to work on the video. Will get back to you soon.

Starting too? 2:09 PM

Fine. 2:09 PM

Don't forget, yield information is important

2:10 PM

X amount can destroy Y object. And then scale upward so we can utilize a yield. Also make one version with hydrochloric acid if available. We need to test the safer catalyst

Perfect. This should be able to be uploaded to YouTube legally as well.

5:30 PM

Now this kinda quality is what's needed.

5:31 PM

Because it isnt inherently used for crimes it should pass off fine

5:31 PM

This works well. For multiple reason firstly, with the yield we know exactly what we'll need. And can price our efforts accordingly, for material this is also good as we can find adequate supplies based on need and surveillance. For those on a tight leash use car batteries, for those free and suspected to be undetected, you can gather hydrochloric acid.

Works fine 6:08 PM

Glad you like it Akhee...this is just the beginning.

7:51 PM ✓✓

The best yield results in my opinion are,
tree trunk, car, 900 square foot room,
Half a building. And one full building.

8:53 PM

Okay. 8:56 PM ✓✓

As for the hydrochloric acid. You don't or
shouldn't need a yield for those scales, if
you have extra go for it, if not, please just
apply the math to scale the yield amount.

8:57 PM

Got it. 8:59 PM ✓✓

Doing great work... gonna look into its
legality a bit more. From the surface it
looks fine. So the information should be
acceptable to upload casually.

9:09 PM

Sounds goods, thanks Akhee 9:11 PM ✓✓

Yeah look was going to ask about the work

3:47 PM

Just wanted to make sure in the video when going over using sulfuric acid as the catalyst that you emphasize room temperature control. Trace amounts of sulfuric acid can cause an accidental explosion.

3:48 PM

Which is why safety should be the primary concern of the video.

Be sure to include (if you haven't finished it) that people should make sure the

Be sure to include (if you haven't finished it) that people should make sure the product is thoroughly distilled and sifted, if possible sift VERY CAREFULLY, a secondary time and make sure its stored at an appropriately tempered area. 3:50 PM

Best case scenario we come out with very fine products that took a considerable amount more time to create, but the purity, yield and safety of the product is paramount. 3:51 PM
