Perfect thus far. 7:22 PM

The volume & yeild specifically has a ratio of good importance. 7:23 PM

The tips for safety are also outstanding. As those are the most realistic ways to purchase items required, avoid digitsl tripwires and maintain a low profile. 7:23 PM

Easiest disguises would of course be dense sunglasses, a clean shaven face and a hat. 7:24 PM

Normal glasses work just as efficiently if the clothing attire is appropriately matched to convey a teacher asthetic. 7:25 PM

Also the mentioning of safety apperal needed is well noted, as the chemical smell it gives off, working with such tools and its hazards are important to note.

7:26 PM

The coffee filter is the standard means of filtration, i however am curious if specific brands would allow better yield due to quality of the paper used.

7:27 PM

Video so far is coming out perfect, nothing left undone, everything prioritized & mentioned in a way that can be commonly understood.

7:28 PM

Of course moving forward

7:29 PM

When it comes to the assembly aspect of this

7:29 PM

I would recommend working backwards.

7:29 PM

As having a functioning detonator on hand will allow one to detonate if a raid is conducted.

Also keeping a clean and non accountable work environment is also necessary

As forensics will of course take photos and if things appear to be set up for an attack, prosecution can easily win. 7:31 PM

However by working backwards, having a detonator could potentially be claimed to have been used with a science experiment (as noted in the opening of the video) with no malicious intent to harm. 7:32 PM

As the power source used to detonate could be applied to a variety of other applications. Such as a potato clock, making a jerry rigged, remote controlled item. 7:33 PM

Etc etc etc. 7:33 PM

Secondly, TIME. Time must be emphasized in a seperate video when it comes to the usage of this. 7:34 PM

This initial video is basically how to safely create and use TATP without setting off any federal alarms. Its purpose is not to harm but simply to educate 7:35 PM

A follow up video on high value targets, understanding contemporary warfare in comparasion to classical islamic warfare, how to scout locations & people, mental & religious preperation, use of disguises, basic legal information required to appropriately scout without being detected or raising alarm.

When to strike and how,

As well as tactical analysis of active shooting scenarios, law enforcement response & how to successfully leave an area without being caught, are all things for a seperate video.

One video being the primer, while the second being the catalyst or detonator.

7:39 PM

That being said, this initial video is extremely important as thus far it appears to be legally compliant with US law and thus subject to enter public domain for responses & communication.

7:41 PM

That being said, if this video can be published two things will happen.

That being said, if this video can be published two things will happen.

1: the Islamic world will have a better grasp on how to defend itself with the usage of explosives in a reasonable & safe manner.

2: everyone who sees, uploads, reuploads & shares this video will be aware of how to safely and accurately create & use explosives.

Which means the list of potentially dangerous people escalate from being small and well managed to being completely useless as everyone becomes a tier 1 threat.

As a result of that, it is possible

That people of interests within the Islamic field will be taken with more precaution & treated better as the results of upsetting a suspected terrorist will only exacerbate any hostilities they already have thus endangering others as a result.

A few other notes 7:47 PM

If this video is produced and is fully legally compliant the main stream media of course will remark on the video which will only cause it to spread even further thus educating even more people, when the backlash happens of trying to censor the information curiosity will compel even more people to seek it out and watch it, which in turn only helps everyone as this information becoming general knowledge is extremely useful to the world as a collective. Examples, (Venezuela, Libya, France, Yemen, Northern China, Burma, Palestine, Syria, Saudi & Iran)

Each place has political turmoil, the information provided can & would assist the general population against the corrupt or oppressive people.

Where as with Blue, its the ending to cowboy bebop, in that death, a happy death is the ultimate ending of those who embark on this path.

Spike went to go kill the syndicate knowing the mission was somewhat of a suicide mission. Yet he didn't claim to do so to die. He left on the mission to "see if I'm really alive." People often claim they feel the most alive on the battlefield. Or when near death (if you've observed the elderly on hospice) so with blue you're kind of stating this is about Your Ending and how you choose to embrace it.

That was well made 12:16 PM

A bit, unusual.... 12:16 PM

But well done 12:16 PM

Alright, so do you have TOR and or a decent VPN service? 12:17 PM

I'm surprised you had a car to waste 12:18 PM

But a necessary sacrifice for science. 12:18 PM

More surprised you could actually demolish a barn.

How exactly did you manage to do that, even in a rural area, with no one saying anything???????????????? 12:19 PM

The sound effects from the blast alone would have been heard for several miles 12:19 PM

Well, doesn't matter. The video appears to be legal, well scripted, shows proper yield, creation and where to obtain supplies. 12:20 PM

I suppose storage could have been an issue, however, that's something you actually have to have a federal explosives license to have. So I'm pretty sure if you're just getting rid of a stump or... car. It's fine, assuming local/state laws & no one is injured.

12:21 PM

Akhee, the next version I will send to your shortly is the one with the Nasheed...

Yeah 2 is pretty solid. 2:48 PM

I think it'll have a more general appeal to
muslims

2:48 PM

Agree Akhee. 2:56 PM ✓✓

Now, since the first set of videos are finished do you still want to work on another set of videos?

3:04 PM ✓✓

Ahh ahh... 3:18 PM

Aye* 3:18 PM

Gonna need to let this cool down a bit though.

3:18 PM

Talked to my lawyer and waiting to see if he and a couple other people mind reviewing it

3:19 PM

From my perspective looks 100% clean and legal

3:19 PM

However if you'd like, you can do a test run of the product

3:19 PM

You familiar with bitchute? 3:19 PM

It's a video streaming platform like youtube

Cept it's more wild west out there. 3:19 PM

So here's what we'll do 3:20 PM

Either you or I will upload to it. 3:20 PM

Give it some time and wait to see how it does. I already out flames of war 2 up, never got taken down. So I assume its safe to upload other information and videos there 3:20 PM

Moving forward 3:20 PM

It'll go down like this. Once I get the A-OK from my lawyer or someone else who I believe has some legal authority. I'm gonna go ahead and upload it raw. Then after a day or two I'll upload it to youtube as well 3:21 PM

Should gain some traction 3:21 PM

Seeing as how it's a legal video with adequate depictions, details and information without any instructions to harm others and can be used for honest practical purposes (as seen in the video via rural explosions) 3:22 PM

All we need to do from there is one of two

All we need to do from there is one of two things.

3:23 PM

1: give it to someone with a decent t audience to review or look over. A demolition channel or something of the sort. 2: wait for the information to reach those in need, i.e Hong Kong protesters, Baghdad protesters or Venezuela for example.

Once the information is public, open and utilized by a few people of the general public the job is done.

3:24 PM

Sorta like how napalm is a well known thing to create, problem is it doesn't have much practical use, THIS however does.

3:25 PM

So, once everyone knows how to make and utilize explosives safely, then we can move on to social engineering

3:25 PM

Those videos will be a bit more.... difficult to create, as they'll require me to do a good 90% of the research, scripting, fact checking, and siteing sources, once that's all done I have to edit the work into

3:25 PM

Those videos will be a bit more.... difficult to create, as they'll require me to do a good 90% of the research, scripting, fact checking, and siteing sources, once that's all done I have to edit the work into something cohesive have you and or others look over the script and then give it to you to edit. From there I'll publish it on my own platform.

3:27 PM

If you're familiar with the, light and knowledge series, think that. That's pretty much what we'll have to do but on a more general sense, then we gradually make the appeal and information more lenient on Islamic society and the need to respond to the war on islam. From that point

3:29 PM

Well, after that part is complete, then its straight up after that.

3:29 PM

I have other projects I need to start working on for other brothers, so follow your plans as to how you will publish these videos.
