

The Arab Front for the Advocacy of Iraq and Palestine

To the Militant President Saddam Hussein, may God protect him

Greetings and regards,

On the occasion of your glorious birthday, the Front for the Advocacy of Iraq and Palestine offers you its sincerest congratulations, and pray to God to grant you health, fitness, and victory over your enemies as well as long life...

Mr. President

Your glorious age is not measured by the number of solar or lunar years, but rather by the number of positive achievements and successes, heroic stands, magnanimity and pride, facing and standing up to the tyrants, aggressors, greedy, and to those who conspire against you personally and against brave Iraq and its staunch, courageous and militant people, who bow only to the One and only Creator.

On this happy occasion, we have decided to give your name to the first television studio at the Arab station ARBC, which will soon begin its broadcast, god willing, thanks to the personal assistant and support anticipated from you personally. We will broadcast in the English language only, 24 hours a day, 7 days a week, all year long. Programs will be varied and diversified, and broadcasted in the United States and throughout the world. This is the first Arab television station which will be broadcasting in English, and is honored to be launched with your assistance and support. The station is important and much needed, and its impact would surpass all military weapons. It would also clarify to the American public opinion the true Iraqi position, and would expose the American and Zionists policies, as well as the conspiracies that are concocted against you, against Iraq and Palestine, and against the whole Arab nation.

We pray that you remain a repertoire for us and for militants around the world.

Happy New Year, and we hope that each year will find you in good health

Secretary General

The Arab Front for the advocacy of Iraq and Palestine

Professor Sha`ban Hafed Sha`ban

The United States 04/28/2002
