Interview with Nihad Awad Executive Director of CAIR

The Jews plans (through the films they produced in Hollywood) to distort the Islam's image and succeeded in their plans.

We bought a building near the American Congress for he Muslims and we need the help of all Muslims in all the world.

America is the best country for spreading of the Islam and it is not like Europe. and in America they need Islam which is now the fastest spreading religion in the US. and they are more than 8 million Muslims.

Islam is now a strong political voice in the U.S. and everyone is running after their votes. The experience of CAIR should be also applied and spread in France, Italy, Britain, Australia, India and South Africa.

We faced an American institution that produced a book that was more dangerous then Salman Rushdie book.

Hundreds of films were produced by Hollywood to distort the image Islam.

The executive manager of the Islamic-American relations council, "We confronted and American Foundation that issued a more dangerous book than the impious Salman Rushdie's writings."

Nihad Awad specified that Islam is quickly spreading a money the American people, and in a special interview with the ME, he said that Muslims suffer from was the deforming campaigns by enemies of Islam carried out and focused on making movies which cost between 80-100 million. The most famous of these is "Military Law", which aims at deforming the image of Muslims considering them to cause harm and threat to America.

The second stage was to reveal Muslims as bloody terrorists and extremists. As well as, forming a threat on the Western civilization.

This Jewish plan had borne hostility towards Islam and deforming its image. Among these stories is the Egyptian Boeing crash which was said to be a suicidal operation and that the last work of "depend on God" which were said by the pilot indicate the action of a suicide.

Not a single positive story was ever said about Islam before 1994. It was important for (CAIR) for gather the Muslims efforts to redeem their rights especially after the hijab issue which became natural in America. He said that America is a country prepared for the call for Islam because it has no hostile roots as the case in Europe, Muslims have a political measure, and everyone searches for their voices, adding that they have enough awareness, which is evident in the experience of the American-Islamic Council, now required in France, Italy, Germany, Britain, Australia, India and South Africa.

"We have bought land near the American Congress which cost \$10 million, we need the support of benevolent people and we ask the Lord for success." He said that a lot of bad images of terrorism which form 96% affect Islam although only 4% of its is in the Middle East.
