

Hamas War Tactics: Attacks from Civilian Centers

Evidence of Hamas' Violations of International
Law through Use of Civilian Facilities and
Densely Populated Areas for Terror

Hamas: Defining the Battlefield in Gaza

- Hamas uses UN facilities, schools, childrens' playgrounds, water towers, mosques and countless other active civilian facilities as launching sites for rockets and attacks. **In this operation alone, Hamas has launched above 1,600 rockets from civilian sites.**
- Additionally, Hamas purposefully engages IDF troops in conflict in urban areas. For example, in Shuja'iya and in Jebaliya, IDF troops have come under intense attack by terrorists from highly populated areas, and have been forced to defend themselves.
- Hamas also uses civilian infrastructures for other military purposes, and places weapon caches and C2 centers in civilian places.
- Hamas' tactic serves two purposes. Firstly, because the IDF responds to attacks with acute concern for innocent lives, attacking from these sites gives Hamas a major strategic advantage. Secondly, any civilian casualties that are incurred from these attacks are used to create international pressure against Israel, even though it is ultimately Hamas that is to blame for these deaths.
- Such tactics flagrantly violate international law and the most basic of moral precepts.

Summary

Hamas uses Schools, Universities, UN Facilities, Red Cross Facilities, Mosques, Power Plants and other civilian facilities as launch sites for rocket attacks on Israel's Civilian population.

Hamas purposefully engages IDF troops in conflict from dense urban areas such as the market in Shuja'iya or from Humanitarian facilities such as the UNRWA School in Jabal'iya.

Hamas' tactics flagrantly violate international law and the most basic of moral precepts. Given these tactics, the ultimate responsibility for the damage done to civilians as well as the civilian infrastructure of Gaza lies with Hamas.
